Survey undertaken by Geoff Mawson OBE

This table has been tabulated together with the species status in Birds of Conservation Concern (Eaton et al 2015)

Red list species are of high conservation concern having declined by 50% or more in population or breeding range in the last 25 years.

Amber listed species are of medium conservation concern, having suffered between 25% and 49% reduction in breeding or non breeding populations, breeding or wintering ranges.

Green list species have a favourable conservation status.

Schedule 1 birds, their nests eggs and young are protected by special penalties under the the Wildlife and Countyside Act (WCA) 1981
